

Smart Gateway (Zigbee) EN

User Manual

view

HomeHub Bluetooth is a highly integrated smart gateway consisting of a Wi-Fi module and a Bluetooth Low Energy module. The hub is used to connect Zigbee smart appliances and monitor the status of wireless switches and sensors. Used with the Meshhub Home App, the Hub can bind various devices as its sub-device and provide multiple cloud functions such as remote control, voice control, and home automation.

Installation

The Meshhub Home App is the mobile platform for controlling Linkoze devices. You can search "Meshhub" in the mobile application store to install the App.

Reset

reset the hub by the following steps:

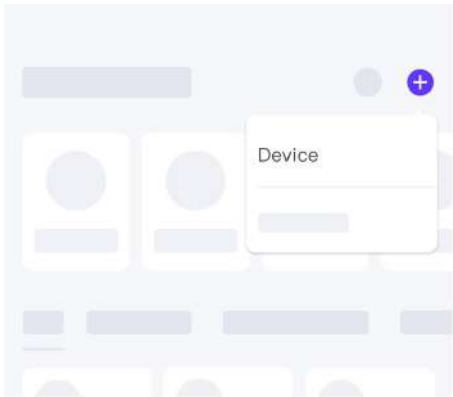

press the reset button for over 5 seconds.

release the button when both lights go off.

the hub is reset and ready to be paired when the red indicator starts to flash continuously.

Pairing

to pair the hub, enter the "Add a device" page in the app, then click the HomeHub button and follow the instructions in the app to pair the

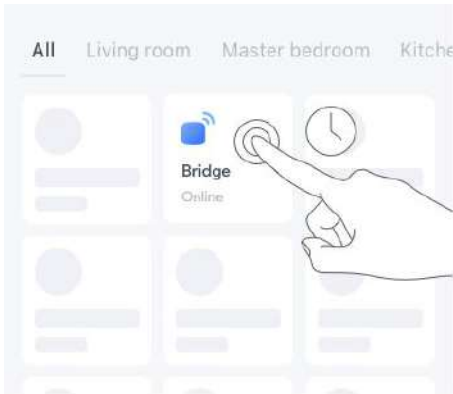

Click the "+" button
