V502

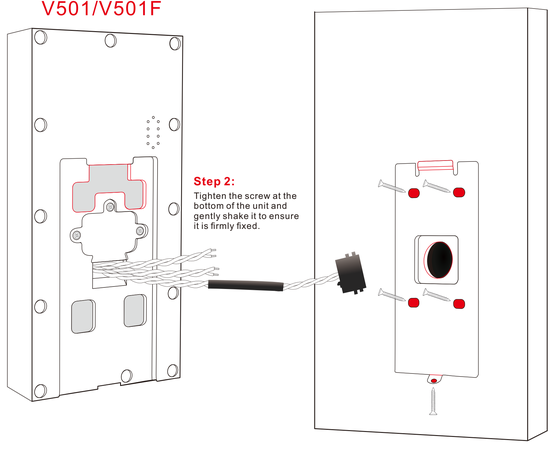

Step 1:
Mark the installation height on the wall, mark the position of the mounting holes, align the bracket for drilling, insert expansion tubes and screws, and secure the bracket.

Step 2:
Tighten the screw at the bottom of the unit and gently shake it to ensure it is firmly fixed.

Step 3:
Route the cables through the hole in the wall, then clip the unit into the slot on the bracket.

V501/V501F

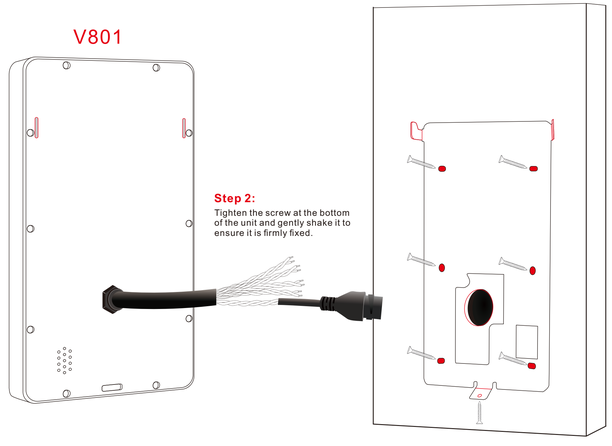

Step 1:
Mark the installation height on the wall, mark the position of the mounting holes, align the bracket for drilling, insert expansion tubes and screws, and secure the bracket.

Step 2:
Tighten the screw at the bottom of the unit and gently shake it to ensure it is firmly fixed.

Step 3:
Route the cables through the hole in the wall, then clip the unit into the slot on the bracket.

V801

Step 1:
Mark the installation height on the wall, mark the position of the mounting holes, align the bracket for drilling, insert expansion tubes and screws, and secure the bracket.

Step 2:
Tighten the screw at the bottom of the unit and gently shake it to ensure it is firmly fixed.
