

Smart Motion Sensor Night Light Model: TM-X1001W Product Description  Front View Right Elevation Distribution network key function 1 Press and hold for 3 seconds (the white light sensor will flash 3 times) 2 Short press to turn off the light >> press the third time to turn on the light.	Product Feature 1 Intelligent human body induction night light energy saving and environmental protection. 2 Five-color light APP intelligent adjustment. 3 Five-color light APP intelligent adjustment. 4 Five-color light APP intelligent adjustment. 5 Five-color light APP intelligent adjustment. Technical Parameters 1 Induction Distance: >40V 2 Induction Angle: 120° 3 Sensing Distance: 5m 4 Sensing Distance: 5m 5 WiFi IEEE802.11 b/g/n (2.4 g) Download APP and connect Two smart is available for both IOS and Android. Support 	Set Up Notes Night light only supports 2.4GHz wifi router, not 5GHz router, please set the relevant parameters of the router to 2.4GHz. Connectors such as -l @43% 84% etc. When the router is connected, the light will flash as fast as possible to the router to speed up the configuration of the night light. APP Registration Please keep network on/kick Click "I agree" and click "Register" and the "Privacy Policy" and click "Agree" that is legal and valid mobile number or email address, and then log in the APP.	Configure Network For Click "Turn on Bluetooth" and click the "Add Device" or "+" icon to add a device at the same time, night light, and the light flashes slowly to enter the pairing state. At this point, the APP pops up a device discovery pop-up window. 	Click "Yes" "Skip" >> "+", select the connected WiFi and enter the password, click "Next", wait for the device to connect, then the device will be added to the APP. Click the "+" icon to return the device name, and click "Finish" in the upper right corner. 	On the home page of the APP, click to enter to the device management page, click the "Add Device" icon to add a device, then the device will be added to the APP. Click the "+" icon to return the device name, and click "Finish" in the upper right corner.  On the home page of the APP, click to enter to the device management page, click the "Add Device" icon to add a device, then the device will be added to the APP. Click the "+" icon to return the device name, and click "Finish" in the upper right corner.		On the home page of the APP, long press the device icon to enter the device management window, select the device that needs to be removed, click the "Remove" icon to confirm the removal of the device, click OK to complete the removal of the device. 	Product Installation  The sensor head can be inserted into indoor wall panel or indoor wall row. CAUTION 1. This product is not waterproof test, please do not use it in wet environment. 2. Do not use this product as a toy for children in case of damage. 3. This product is strictly prohibited to disassemble, so as not to cause damage or danger. 4. This product is strictly prohibited to use in the environment of high temperature, high humidity, and so on. 5. This product is strictly prohibited to use in the environment of high voltage, high current, and so on. 6. This product must be subject to transport failure in the environment of high temperature, high humidity, and so on. 7. Please do not use this product in the environment of high voltage, high current, and so on.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
