Frequently Asked Questions

1 Can I share with family and friends?

Yes, you can share your cameras with family and friends who will have access to view the camera and control your bulbs, plugs, and other devices. In the app, press the Profile button and click on the "Home Management" button, and you will be able to give or revoke sharing permissions. In order to share the other user should already have downloaded the app and registered a new account.

2 What's the Wireless?

The range of your home Wi-Fi is heavily dependent on your home router and the conditions of the room. Check with your router specifications for exact range data.

3 How many cameras can I control?

TuyaSmart app can control an unlimited amount of devices in an unlimited amount of locations. Your router may have a limit of how many devices can be connected to one router.

Warning

Federal Communications Commission (FCC) Declaration of Conformity

FOR CAUTION: Any change or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

Important: The following are the FCC's Rules and Regulations that apply to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference that it may receive. The following are the Rules and Regulations that apply to the following two conditions: (1) This equipment has been tested and found to comply with the limits for a Class B digital device pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. (2) This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause interference to radio communications. If you are experiencing interference problems, you may wish to take the following steps: (1) Reconnect the equipment to a different outlet on a circuit different from that to which the receiver is connected. (2) Increase the separation between the equipment and receiver. (3) Reroute or relocate the receiving antenna. (4) Increase the separation between the equipment and receiver. (5) Consult the dealer or an experienced radio/TV technician for help.

Radiation Exposure Statement
This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.

Important Note:
This equipment should not be installed to co-locate and operate simultaneously with other radios or host system except in accordance with FCC multi-transmitter product procedures. Additional testing may be required to ensure that the equipment does not cause harmful interference.

The availability of some specific channels and/or operational frequency bands are country dependent and may not be available at the factory to match the intended destination. The firmware setting is not accessible by the end user.

The host product manufacturer is responsible for compliance to any other FCC rules that apply to the host not covered by the modular transmitter grant of certification. The final host product shall require Part 15 Subpart B compliance testing with the modular transmitter installed. The end user manual shall include all required regulatory information/requirements shown in this manual, including: This product must be installed and operated with a minimum distance of 20 cm between the radiator and user body.

SMART WI-FI CAMERA USER MANUAL

Please read the instruction manual carefully before using the product

Get Ready

Know your Wi-Fi network and password
Make sure your mobile device is running iOS 8.9 or higher or Android 4.1x or higher
Make sure you're connecting to a 2.4GHz Wi-Fi network (It can't connect to 5GHz networks)

1 Download the TuyaSmart app from App Store or Google Play.

2 Register an account on your TuyaSmart app

STEP 1.
Enter your mobile phone
number or email address.

STEP 2.
Enter the verification code
and create a password.

3 Add The Device-Scan QR code mode

.Make sure Wi-Fi is available and connected to the Internet.
 .Connect the camera to the power, then system startup completed.
 .Open "TuyaSmart" APP, press the '+' in the upper right corner of the main screen. Choose "Camera & Lock". click "Smart Camera(Wi-Fi)" (Figure 01) to add camera, and then click "Next " (Figure 02)

Please note that only 2.4 GH Wi-Fi network is supported

.If the mobile phone is not connected to Wi-Fi, please click "Connect to Wi-Fi":

.It will jump to the WLAN interface and connects Wi-Fi

If the phone is connected to Wi-Fi (Figure 06):

A QR code will prompt on your screen and you need to scan it with the Smart Camera. (the camera is about 15-20 cm away from the mobile phone lens). Then click "hear the prompt sound" (Figure. 07).
"Connecting(Figure.08):

4 Adding device

Connection completed(Figure 09), and click "Done". Then jump to preview interface (Figure 10)

After closing the device preview interface, the interface returns to the APP home page. At this time, the connected device will appear on the APP home page (Figure 11). Then you can click directly to the device interface to see the monitoring situation without re-adding afterwards.

Add the device-BLE connect network

Press the '+' in the top right corner of the main screen (Figure 11)

Device to be discovered after camera self-check. Click Add, input 2.4GHz Wi-Fi network (It can't connect to 5GHz networks), click next and waiting camera connect network until it shows Added successfully(Figure 9)

Warm tips: Select Wi-Fi or BLE connection. If Wi-Fi connection was successful previous, this step can be ignored. Make sure you have turned on your smart phone's bluetooth and grant the bluetooth permission to the Smart App.
