

尺寸：70X70MM

Product Specifications

Product name	Smart Gateway
Product model	GW16-Wired
Battery specifications	DC 5V 1A
Operating temperature	-10°C - 55°C
Operating humidity	10%-90% RH (no condensation)
Wireless connection	ZigBee

Packing List

- Zigbee smart gateway x 1
- DC5V power supply x 1 (Optional matching)
- Network cable x 1
- Instruction manual x 1
- Power cable x 1

Please read the instruction manual carefully before using the product

Product Description

The smart gateway is the control center of the ZigBee device. Users can design and implement smart application scenarios by adding ZigBee devices.

A line drawing of the Smart Gateway device. It is a small, rectangular unit with rounded corners. On the front face, there is a small square status indicator light at the top left, a small circular reset button at the top center, a power socket at the top right, and a network cable port at the bottom center.

Preparation For Use

- ① Mobile phone is connected to Wi-Fi

A diagram illustrating the network setup. A smart phone is shown on the left, connected to a Wi-Fi network. A cable connects the Wi-Fi network to the LAN port of a Wi-Fi wireless router. The router is then connected to the Smart Gateway.

Ensure that the smart phone is within the same Wi-Fi network of the Smart Gateway to ensure an effective connection between the smart phone and the Smart Gateway.

Preparation For Use

- ② Download and open the App

In the App Store, search for the relevant App or scan the QR code on the package/manual to download.

If you are downloading the App for the first time, please tap "Register" to register your account. If you already have an account, please click the "Login" button.

A square QR code located in the bottom left corner of the Preparation For Use section.

Network Settings

- Connect the gateway to the power supply and connect it to the home 2.4GHz band router through the cable, please connect power to gateway first, the blue indicator light will turn on, then connect network cable.the indicator light will flashing, then go to next step;
- Make sure that the mobile phone is connected to the home 2.4GHz band router. At this time, the mobile phone and the gateway are in the same local area network;
- Open the "My Home" page of the App and click the "+" button on the upper right corner of the screen;
- "Gateway(Zigbee)" will appear on the"Gateway Control" Page,click it for adding device"
- Then follow the App's instructions to finish adding device;

Add Device

A screenshot of the mobile app interface. The top bar shows the time as 10:59. The main screen is titled "Add Device" and shows a list of devices to add. The first device listed is "Zigbee LAN Gateway". Below the list, there is a "Add Device" button.

- Once the device has been added successfully, you will be able to find the device on the "My Home" page.

Smart Gateway
