4.Description of parts:

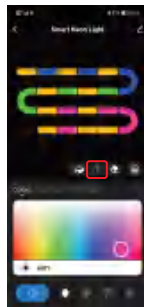

Adjusting the colours

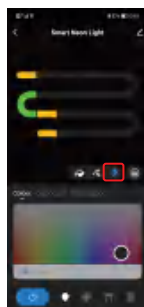

1. Use the Fill tool to change all the bulbs to one and the same colour.

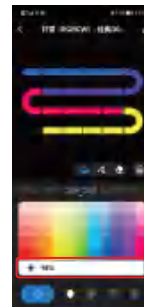

2. Use the Pattern tool to create custom patterns. Once selected, choose a colour.

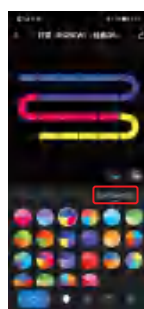

3. Use the Eraser tool to delete colours that have already been selected.

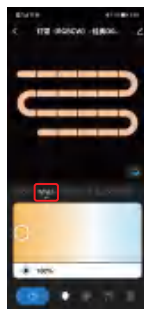

4. Set the brightness for the bulbs.

5. There are a total of 22 color combination modes.

6. The White tab will turn all the bulbs white. The Eraser and Colour pattern tool can be used afterwards.

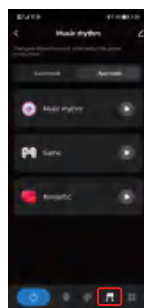

7. The Scenes tab has all the dynamic pattern effects. You can preview each style.

8. There are different chase dynamic effects in life mode.

9. Music mode: Using the phone microphone, the lights will change in tune with the music that is playing.

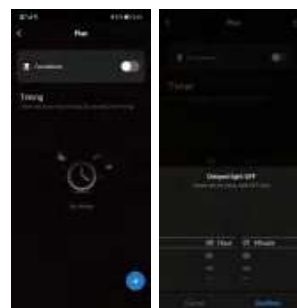

10. Tap the Preview button to check the scene you have created. Then hit save and name it.

11. Click on the length of the light strip to freely set the actual length of the light string.

-Timer: You can set a timer to automatically turn off the string lights.

6. Maintenance

- Always unplug and allow the rope lights to cool down before long-term storage.
- Regularly check the product for possible damage due to outdoor exposure.
- If necessary, clean with a slightly damp towel and wipe it dry with a soft cloth.

Recycling helps to reduce the consumption of resources and reduce the environmental impact. If you wish to discard the packaging, comply to the environmental legislation in your country.
