

Dual Color LED Flexible Sheet

- **Excellent luminous effect:** Dual white flexible cuttable LED light sheet 2600K to 6500K dimmable white LED sheet adhesive backing. CCT LED layout with 440 individual circuits. The flexible LED light panel features a high CRI 2835 LED.
- **Connectable for large area illumination:** Ultra thin flexible LED sheet utilizing an ultra thin flexible printed circuit board, the white dimmable flexible LED light panel can be easily integrated into the surface of the mounting object. up to 3 sheet can be connected in series.
- **Cut to size easily:** Flexible LED sheet can be cut to size. Each individual circuit include 2 LEDs. It can be customized to meet specific lighting need. The features makes it suitable for a variety of installation from small accent lighting projects to large scale applications in area such as backlighting.
- **Flexible, bendable, foldable:** This flexible LED sheet can be bent or folded. You can fit it into a curved surface or fold it at 90 degrees to fit a square corner with strong adhesive and screw hole design. The sheet is easy to install, not easy to fall off.
- **Wide application:** Mainly used for backlight, translucent materials such as marble, onyx stained glass and acrylic, perfect for home and hotels, shopping malls. You can cut it into special shapes for signage and logo lighting.

Product Code	32442
Sheet Size	L480mm*W240mm*H8mm L19.0"*W9.5"*0.3"
Input Voltage	DC24V
LED Chip	SMD2835
Light Color	2700K~6500K
LED Quantity	440LED/Sheet
Working Power	60W
Cut Unit	2 LED
CRI	>90
Lifespan	+50,000 hours
Beam Angle	120°
Working Temp	-25~60°C (-13~140°F)
Waterproof Rating	IP20
Wire Length	15cm (6")
